### SUMMARY

Keertana Nandyala is an experienced Project management professional with over 18 years of total Information technology experience. I have solid experience in Project and Program Management, SQL/BI development. I am a life-long learner and I seek to grow knowledge and leadership in the field of Technical Project and Program Management.

### EXPERIENCE

#### Solution Architect – AI and Automation

##### Wipro

C 08/2025 - Ongoing e Redmond, WA

Focused on task automation, Copilot integration, and Agentic AI design to enhance business efficiency.

Collaborated with cross-functional teams to define automation use cases and deliver scalable AI-driven solutions.

Designed end-to-end automation strategies, aligning with organizational goals for productivity and digital transformation.

#### Transition Manager

##### Wipro

C 02/2025 - 07/2025 e Redmond, WA

Directed transition efforts for 700+ candidates (rehired staff, internal transfers, and new hires) across Americas, EMEA, and APAC regions.

Managed multiple service lines, ensuring continuity and smooth integration throughout the transition.

Coordinated rehire processes with previous employers and Talent Acquisition, adapting to region-specific hiring timelines.

Partnered with IT and laptop provisioning teams to validate candidate data, deliver equipment, and ensure domain-joined systems were ready for day-one productivity.

Oversaw email migration and access continuity, minimizing downtime during employee movement.

Improved data quality and stakeholder reporting, ensuring timely decisions and approvals through the project charter process.

Achieved consistent on-time delivery across transition phases, contributing to the overall success of the program.

#### Technical Program Manager

##### Wipro

C 02/2022 - Ongoing e Redmond, WA

Facilitated sprint review and planning meetings with engineering teams, overseeing product backlog management and adherence to Agile best practices.

Achieved 100% on-time delivery across a project portfolio exceeding

\$1.5M in revenue.

### SKILLS

Problem Solving, Analysis, Leadership, SQL, Kusto, Excel, Power BI, React JS, Azure ML, Azure PaaS, ADF, ADO

#### INDUSTRY EXPERTISE

##### Agile Practices

##### SQL\BI Development

##### Project\Program Management

##### Problem Solving\Analysis\Leadership

##### AI and ML

### EDUCATION

B.Tech, Electronics and Communication Engineering  
G.Narayanamma Engineering College

e Hyderabad, India

### AWARDS

S Received "Above and Beyond" performance from HCL for 3 quarters.

## EXPERIENCE

---

and support standards, implementing serialized technical training and work effort tracking process that boosted productivity by 20%.

Led Supportability projects within the M365 space from inception to completion.

Spearheaded the migration of a Machine Learning Project to Azure, automating resource creation with Bicep templates, reducing manual workload by 75%.

Developed Azure architecture diagrams and comprehensive project documentation, ensuring compliance and security standards were met through stakeholder collaboration. Created Power BI reports to visualize model outputs across various product categories, enhancing internal stakeholder decision-making.

Played a key role in interviewing, hiring, onboarding, and offboarding for multiple projects.

Managed a team of over 15 direct reports, overseeing project and people management activities.

### Senior Project Manager

#### HCL Technologies

C 10/2016 - 02/2022 e Redmond, WA

Managed multiple projects (~\$2M) from initiation to closure, including scope, timelines, budget, and execution.

Collaborated with engineering and program management teams; led sprint planning, reviews, and stakeholder updates.

Designed application architecture and identified/mitigated risks during monthly/quarterly service reviews.

Automated task reporting of Azure DevOps work items using .NET; developed end-to-end modules with React.

Hired and onboarded employees across projects, ensuring smooth integration into teams.

Hands-on with Azure services: Web Jobs, App Services, Access Controls, Automation Accounts, and Runbooks.

### Software Developer

#### Hewlett Packard Enterprise

C 10/2008 - 07/2016 e Dublin, OH

Developed data conversion logic and import files for employee retirement systems; monitored and stabilized monthly payroll runs by diagnosing and resolving defects.

Designed and optimized SQL Server solutions (Stored Procedures, Functions, Views, complex queries) to improve performance and reliability.

Built and migrated reports (BRIO → SSRS, Active Reports .NET 6.0, QlikView dashboards) and integrated reporting with C# .NET + SQL Server 2008.

Designed and deployed OLAP cubes with advanced MDX calculations to enable complex reporting and analytics.

Authored SSIS packages and automated workflows with PowerShell; created data models (Erwin), data dictionaries, and supported **build/deployment**.

Performed comprehensive DB maintenance including backups/restores, index rebuilds, statistics updates, maintenance plans, and SQL jobs.

## PERSONAL PROJECTS

---

### Moments N Memories C 07/2019 - 12/2019

e Bothell, WA

Developed Instagram clone using MERN stack and deployed to Heroku.

### Amazon Clone C 01/2022 - 02/2022 e Bothell WA

Developed Sign-in, Main Page, Cart in Amazon clone project using MERN stack and deployed to Firebase.

### Github Account

## VOLUNTEERING

---

### Teaching Staff

#### Manasamskruti

C 2018 - 2025

Teaching a world language (Telugu) to second and third grade kids.

## Certifications

---

### AI-900

#### Microsoft Certified: Azure AI Fundamentals

Credential ID: 3818196E4F53CADF

Certification number: OA44EE-23B502

Earned on: April 19, 2023

## Past Experiences

---

### BI Developer

Verizon, India - 10/2006 - 03/2008

### Developer

Satyam, India - 05/2004 - 10/2006
